### GAVASA Instrumentación y control industrial

## **Benefits**

- Dew Point Transmitter made for Ex-Applications (IECEx, ATEX, GB Ex)
- Robust enclosure for the use in rough industrial environments
  - Dual sensor technology for the highest accuracy over the full range of -100 ... +20 °C Td
- G1/2" Stainless steel process connection
  - 4 ... 20 mA analog and Modbus/RTU digital outputs for highest flexibility

## Reliable dew point monitoring

The S230 / S231 dew point sensor from SUTO offers reliable and customer-oriented measurement technology in a robust housing. The sensor is used in harsh industrial environments and, thanks to the compact housing, offers easy integration into existing processes.

The unique dual sensor system combines two measurement methods in one sensor. The sensor offers highest precision and accurate measurement results over the entire measuring range. The intelligent measurement technology automatically selects the appropriate measurement method, thus ensuring the reliability of the measurement results.

The S230 / S231 is preset at the factory and is ready for immediate use. The output signals available are an analog 4 ... 20 mA signal and a digital Modbus/RTU signal. We will be pleased to set the parameters to suit your application. Alternatively, you have full access to all settings via the service kit.

## Accessories
